

GENERAL INFORMATION

author(s)	Vande Walle I, Verheyen K, Lemeur R
year	2006
English title	Inventory of the experimental forest Aelmoeseneie (January 1997)
original title	Inventaris proefbos Aelmoeseneie (Gontrode) januari 2006
reference	Internal report, Ghent University, Ghent
pages	38
type	report (r)
ecosystem service	supporting – tree growth
keywords	
taxa	
project	
supervisor	Lemeur R
institution	Laboratory of Forestry, Laboratory of Plant Ecology
location	pdf, hardcopy
data	appendix 3 (p 26–38)

MATERIALS & METHODS

study area	5n (scientific zone)
time period	winter 2005
goal	
set-up	all trees with a dbh > 7 cm in the scientific zone
data collection	species, circumference at breast height
remarks	the stems of multi-stemmed trees were considered separate trees tree height data of 1997 were used

RESULTS

Stem density, mean diameter, basal area per species is reported for the ash and the oak-beech plot. Volume and biomass were calculated.
